

Houghton City

This city is the location which you will start the game and complete tutorial missions to ease you into the game and allow you to explore the area. After completing the tutorial the player can choose what they would like to do, whether it be questing, exploring, fighting etc.

This is a great location to begin the game as there is plenty to do. It perfectly shows the 3 main routes players can take in the game: explore and question NPCs to learn about lore, progress through the story or go for the best gear you can to kill enemies faster and more efficiently.

Lore:

An enclosed ^{mining} city with borders that are closed to anyone who isn't born there. Do not interfere ^{with} or care about who are North and South of them. All pray to the big blue beacon, and as well as mining for resources they are fueled by curiosity towards the source of the blue beacon.

The King feeds off power and control, and doesn't want people to leave the city in case they rebel or pose a threat to his civilisation. In the game you play as a young adventurer who uses his skills in combat to try and figure out what is going on and how the past shaped your life, by trying to figure out the mysteries of the Abyss, the Beacon and the outside of Houghton.

Quests
